

Aquaworx

IPC-Value Panel

The IPC-S02 has all the same features and benefits of our traditional Simplex control panel in a smaller more affordable enclosure. We specifically designed the IPC-S02 Value Panel with a 25% cost savings so that our customers could compete more aggressively.

The Morse code driven, push-to-silence button is replaced with a simple toggle off switch. All the critical advanced features have been maintained to make it the most competitive advanced pump controller in the wastewater industry.

8" x 8" Enclosed

BENEFITS AND FEATURES

Floatless Transducer

Pressure Transducer Bell replaces up to 4 level sensing floats and provides a much more accurate and reliable system.

Event Data Logging

Hand-held MARC (mountable and removable controller) user interface allows for easy programming and event monitoring and recording through a standard SD card.

Simple Wiring And Installation

Panel is specifically designed for the septic environment and provides the installer with simple wiring that saves time and money during system start-up.

Time Dosed And Demand Dosed Technology

Whatever your needs, the IPC-S02 can be programmed as either a time dosed or demand dosed setting.

Proven Performance

Since 1999, more than 14,000 Aquaworx IPC control panels and pressure transducers are serving onsite septic systems throughout North America with a success rate greater than 99%. Compare that to traditional floats!
