

FOR IMMEDIATE RELEASE

Infiltrator Announces Addition of Sheryl Ervin to Regulatory Affairs Department

Old Saybrook, CT – Jan. 22, 2019 – Infiltrator Water Technologies, a leading manufacturer of products for the decentralized water and wastewater industries, is pleased to announce the addition of Sheryl Ervin, PG to the Regulatory Affairs Department.

In her new role with Infiltrator, Ms. Ervin will provide regulatory support to Infiltrator's full range of drainfield, tank, and wastewater treatment products, with an emphasis on the Delta Treatment Systems product line. Ms. Ervin comes to Infiltrator, most recently, from BioMicrobics, Inc. where she served as the Senior Director of Regulatory Affairs. Prior to joining BioMicrobics she was responsible for wastewater systems regulation at the Kansas Department of Health and Environment: Bureau of Water.

The addition of Ms. Ervin to the Regulatory Affairs Department builds on Infiltrator's strong foundation in wastewater treatment systems product regulation, rulemaking, legislation, and standards development and fills a need within the Delta Treatment System business. "I am pleased with this outstanding addition to the Infiltrator team and look forward to working with Sheryl to grow Infiltrator's business, with a particular focus on advanced wastewater treatment" said Carl Thompson, P.E., Vice President Sales and Marketing.

Ms. Ervin is actively involved in organizations throughout the onsite wastewater industry including:

- State Onsite Regulators Alliance (SORA): Conference Planning Committee and Captains of Industry Committee
- National Onsite Wastewater Recycling Association (NOWRA): Education Committee
- Kansas Small Flows Association: Treasurer and Conference Planning Committee

About Infiltrator Water Technologies

Infiltrator Water Technologies manufactures and sells multiple product lines that meet stringent environmental and regulatory requirements for decentralized water and wastewater systems. Through its subsidiary, Delta Treatment Systems, Infiltrator manufactures residential and commercial solutions for advanced wastewater treatment. The Infiltrator team built three of the world's largest injection molding machines in-house, which produce a number of the largest injection molded parts in the world. Through its subsidiary, Champion Polymer Recycling, Infiltrator is a leader in the use of "green materials" including post-consumer and post-industrial recycled plastics for the manufacture of products at its ISO 9001-registered manufacturing facility in Winchester, KY. The company competes on

innovation through 150 granted or pending patents. Infiltrator is a portfolio company of the Ontario Teachers' Pension Plan.

The Ontario Teachers' Pension Plan manages CAD\$193.9 billion in net assets as of June 30, 2018. Teachers' is the largest single-profession pension plan in Canada. An independent organization, it invests the pension fund's assets and administers the pensions of 323,000 active and retired teachers in Ontario. Teachers' is headquartered in Toronto with operations in London and Hong Kong and an office in New York City. For more information, including Teachers' annual reports, visit <http://www.otpp.com>.
